

Issues

Are you wasting money having qualified IT staff manually reset user passwords?

Is your security compromised by weak user passwords?

Can your help desk securely confirm user identity before providing support?

Solutions

**PASSWORD
STATION**

**Reduces
Costs**

Resets
Forgotten Passwords

Password resets are and the #1 cause of help desk calls for most IT organizations -- wasting time, money and qualified staff. Avatier Password Station allows your employees to securely reset their own forgotten passwords in seconds from anywhere, anytime. Employees can reset using a web browser or Avatier's automated telephone system, without calling the help desk! By slashing help desk calls, your organization will save a significant, and easily measurable, amount of money. When help desk support is needed for bigger issues, Password Station securely verifies user identity before your help desk offers support.

Achieving these savings is surprisingly quick and easy. Avatier Password Station does not require an army of consultants to deploy. It can be installed on your web server quickly.

Eliminate your #1 help desk call now, not months from now!

**PASSWORD
BOUNCER**

**Strengthens
Security**

Enforces
Stronger Password Policies

A top source of security vulnerabilities isn't a high-tech threat. It's weak passwords. Avatier Password Bouncer automatically prevents weak passwords, without manual auditing or intervention. There's no "big bang" disruption from mass reset. Existing weak passwords are naturally culled from end user accounts as old passwords expire and new ones are entered by users.

By eliminating the need to constantly audit and discipline users with weak passwords, Password Bouncer will save you hundreds of hours of administrative time each year. And preventing even a minor network compromise immediately offsets the cost of Password Bouncer; making it the most cost-effective insurance your company can buy. Password Bouncer seamlessly integrates with Microsoft Security technologies and can be installed, configured, and deployed in less than a day, regardless of the size of your organization.

Prevent security breaches by eliminating vulnerable passwords with Avatier Password Bouncer.

PASSWORD MANAGEMENT

Connectors Support Sample

Unlimited connectors - over 60 out of the box

APPLICATIONS

Agilysys, Bally, Blackboard, Google Apps, Infinium Self-Service, InfoGenesis, JD Edwards, Kronos, IBM Lotus Notes, McKesson, Micros, Oracle E-Business, PeopleSoft, Salesforce CRM, SAP

OPERATING SYSTEMS

Hewlett-Packard, IBM AIX, IBM iSeries, Linux Redhat, Microsoft Windows Active Directory, Sun Solaris

DIRECTORIES

IBM Directory Server, Microsoft (AD LDS), Novell eDirectory (NDS), OpenLDAP, Oracle Internet Directory, Sun Java System Directory Server (iPlanet, Sun ONE)

DATABASES

IBM DB2/UDB, Microsoft SQL Server, Oracle Database

AUTHENTICATION

ActivCard, RSA SecurID
